

ATTENTION SAVANNA WATER & SEWER CUSTOMERS

*Beginning in June 2019, the City will be starting on the **Wacker Road Reconstruction Project** which entails the reconstruction of the roadway along with new storm sewer, sidewalks and pedestrian crossing signals near the school. The project also includes the replacement of water and sanitary sewer mains along Wacker Road.*

The total roadway project is estimated to cost \$5,314,958 and is being financed by the following programs:

- *A \$1,514,521 Public Works Grant from the US Department of Commerce Economic Development Administration*
- *A \$1,085,035 Economic Development Program Grant, a \$150,000 Truck Access Route Program Grant, and a \$160,000 Safe Routes to School Grant all from the Illinois Department of Transportation*
- *A \$559,910 Water Pollution Control Loan from the Illinois Environmental Protection Agency, for which \$251,959 will be forgiven*
- *A \$987,148 Public Water Supply Loan from the Illinois Environmental Protection Agency, for which \$740,361 will be forgiven*
 - *The two IEPA loan terms will be 20-year loans at 1.0% interest*

Both the Water Pollution Control and the Public Water Supply State Revolving Loan Funds are administered by the Illinois Environmental Protection Agency (IEPA). A portion of the IEPA money to fund these types of projects comes from the US Environmental Protection Agency. SRF programs operate in each state to provide communities with the resources to build, maintain and improve the infrastructure that protects one of our most valuable resources: water.

The overall project will provide an improved roadway transportation, a safer travel environment, along with improved wastewater and water services to the project area and the City's overall collection and distribution systems.

For more information contact City Hall at 815-273-2251.
